EDUCATION

St. John's University | Queens, NY
B.S. in Computer Science and Programming

May 2026

- 3.74 GPA
- **Magna Cum Laude** | Dean's List | Academic Year 2023-2026 | CCPS Honor Society | Phi Eta Sigma Honor Society
- Peer Mentor for Project A.I.M
- Junior Senator for Student Government | International Students Committee Representative
- Relevant Coursework: Programming Language Fundamentals, Database Management, Advanced Data Structures, Artificial Intelligence, Software Engineering, Data Security & Cryptography

PROJECTS & INITIATIVES

- **AI University Chatbot & Knowledge Base** – Developed an LLM-powered knowledge management system for St. John's University using **Python**, **LangChain** and **OpenAI API** increasing response accuracy by **35%** and reducing support ticket volume by **40%** through refined prompt engineering and RAG workflows.
- **AI-JobTrackr – Full Stack Job Application Tracker** – Built a full-stack job search tracker using **React**, **Node.js**, **PostgreSQL** and **OpenAI GPT-4o** with AI-powered resume match scoring, interview prep, and follow-up email generation; deployed on **AWS** with **JWT** auth, **REST API**, and CI/CD via GitHub Actions.
- **Hydraulic Robotic Arm Design** – Engineered a high-torque hydraulic actuation system using **C++** and **Arduino** that increased load-bearing capacity by **45%** over standard electric motors; optimized fluid pressure cycles to improve precision and reduce mechanical vibration by **20%** in automated tasks.
- **Voice Automated Wheelchair Development** – Developed a low-latency voice-control system with **98%** command accuracy using **Python**, enhancing hands-free mobility for users with motor impairments; reduced overall production costs by **60%** (approx. **\$1,200** savings per unit) compared to market-leading assistive technology.
- **NAS Server** – Configured a centralized NAS infrastructure using **Linux SMB** and **Docker**, consolidating **10TB+** of fragmented data while eliminating **\$500/year** in cloud subscription costs; automated redundant backup protocols to ensure **100%** data sovereignty and security.

PROFESSIONAL EXPERIENCE

Software Engineering Fellow - Headstarter

July 2024 - September 2024

- Engineered autonomous agents using **LangChain/Node.js** to automate multi-step data workflows with dynamic logic.
- Hardened LLM security via server-side validation to mitigate prompt injection and hijacking.
- Optimized **SQL**-based RAG systems, improving context accuracy while reducing API token costs.
- Deployed full-stack **React** apps on **AWS** with secure credential handling and low-latency delivery.

Enterprise IT Support & Systems Technician - St. John's University

May 2023 - May 2026

- Managed lifecycle and inventory for **500+** laptops, automating deployments via **Jamf (macOS)** and **Intune (Windows)** while recovering value through end-to-end warranty/RMA processes.
- Administered the **Connect2** system for campus-wide booking and circulation of laptops, iPads, and specialized equipment, ensuring high availability and accurate asset tracking.
- Maintained automated **Kiosk** machines for short-term laptop deployment, troubleshooting hardware dispensing issues and ensuring consistent device synchronization and charging.
- Resolved **15–20** technical tickets weekly using Freshservice, maintaining a **95%** same-day resolution rate for software, networking, and hardware support.
- Supported hardware installations and printer maintenance, performing high-volume toner/fuser replacements, memory upgrades, and component replacements on WEPA print station PCs and high-volume printers.
- Executed red-team usability testing for campus chatbots, identifying vulnerabilities in **Python** scripts to prompt injection and hijacking to improve system guardrails.

CERTIFICATIONS

- **CompTIA A+**
Developing comprehensive expertise in cloud computing, hardware, and software troubleshooting for enterprise-scale infrastructure.
- **Fundamentals of Deep Learning | NVIDIA Deep Learning Institute (February 2026)**
Demonstrated competency in training and deploying neural networks for computer vision and natural language processing using PyTorch.
- **Get Connected | Cisco Networking Academy (March 2024)**
Validated foundational knowledge in computer system identification, network structures, and hardware/software troubleshooting.
- **CompTIA Network+ & Security+ | Expected Q3 2026**
Pursuing advanced credentials in network design and cybersecurity threat mitigation to protect enterprise-level environments.

SKILLS

Technical Skills :

- Java, Python, SQL (MySQL), React, AWS, LangChain, Agentic Frameworks, Prompt Engineering, Zapier, OpenAI API, Git, Docker, Linux.
- ### Professional Skills:
- Technical Advocacy, Systems Operations, Asset Management, Network Administration (Cisco), Cybersecurity Compliance, Chatbot Usability Testing, Infrastructure Troubleshooting, Performance Tuning.
